EXPERIENCE

Frontend Developer / Design Engineer

January 2024 - Present

Freelance & Independent Projects

- Design and deliver responsive, production-ready websites and web applications using React, Next.js, TypeScript, Tailwind CSS, and shadcn/ui.
- Collaborate directly with clients to gather requirements, organize content, and translate business goals into accessible interfaces and effective user flows.
- Develop a bilingual English-French website for CableLink Solutions with dedicated service pages, lead-generation forms, responsive navigation, and SEO-focused content.
- Build and document 40+ reusable components, UI blocks, and interactive patterns with an emphasis on accessibility, responsiveness, maintainability, and thoughtful motion.
- Manage projects from initial design and frontend architecture through testing, optimization, deployment, and ongoing product improvements while keeping client work on schedule.

PROJECTS

UI Library / Registry 🌀 | *Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Motion*

- Build and maintain an open-source, shadcn-compatible UI registry featuring 40+ reusable components, responsive blocks, and animated illustrations for React and Next.js applications.
- Develop registry-based CLI installation, interactive previews, implementation documentation, and accessible, customizable component APIs for easier adoption and maintenance.
- Organize the library around reusable patterns for scalable component architecture and design systems.
- Use Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, and Motion to ship the registry.

CableLink Solutions - Client Business Website 🌀 | *Next.js, React, TypeScript, Tailwind CSS, Sanity, Google Analytics 4, Vercel*

- Design and develop a responsive, bilingual English-French website for a telecommunications business, translating client requirements into an accessible, production-ready experience.
- Build dedicated service and blog pages, SEO-friendly content architecture, and a lead-generation form.
- Integrate Sanity CMS for client-managed content and Google Analytics 4 for traffic, engagement, and conversion tracking.
- Deploy and maintain the site with Next.js, React, TypeScript, Tailwind CSS, Sanity, Google Analytics 4, and Vercel.

Invoicely - Modern Invoice Builder 🌀 | *Next.js, React, TypeScript, Tailwind CSS, Vercel*

- Build a responsive invoice-generation application for freelancers and small businesses with dynamic form state, real-time calculations, four customizable templates, reusable client information, and saved-invoice management.
- Implement synchronized document previews and high-quality PDF and image exports without requiring users to create an account.
- Use Next.js, React, TypeScript, Tailwind CSS, and Vercel to deliver the application.

EDUCATION

Diploma in Computer Programming

January 2024 - February 2025

Humber College Institute of Technology & Advanced Learning, GPA: 3.5/4.0

Toronto, ON

Relevant Coursework: Full-Stack Web Development (MERN), Data Structures & Algorithms, Database Systems & SQL, Object-Oriented Programming (Java)

EXTRA CURRICULARS AND ACHIEVEMENTS

- Recognized as a top contributor to Kaneo.app, a 7.4k+ star open-source project-management platform, with five pull requests improving responsive settings navigation, project validation, internationalization, calendar preferences, and drag-and-drop user experience.
