PROFILE

Frontend-focused design engineer building polished, accessible web experiences with React, Next.js, TypeScript, Tailwind CSS and shadcn/ui. Comfortable owning landing pages, dashboards, component systems, UI motion, API integration and product-quality details. Strong fit for teams that need someone who can turn rough ideas into clean, reliable interfaces.

SKILLS

Frontend	React, Next.js App Router, TypeScript, Tailwind CSS, shadcn/ui, component architecture, accessibility, responsive UI
Backend	Node.js, Express, REST APIs, server actions, auth flows, Firebase, Convex, SQL/NoSQL fundamentals
Design	UI/UX, design systems, landing pages, motion, interaction design, Figma, visual hierarchy, copy polish
Tools	Git, GitHub, Vercel, AWS fundamentals, package management, performance checks, reusable UI registry workflows

SELECTED PROJECTS

Personal Portfolio + UI Registry | navdeepsingh.dev

- Built a portfolio with recruiter/developer modes, bento sections, project archive, skills explorer, contact section and command-k navigation.
- Created reusable blocks/components with shadcn/ui-style structure, polished motion, responsive layouts and accessibility details.

CableLink Solutions | Client marketing site - cablelinksolutions.ca

- Delivered a real-world business web presence focused on clear service positioning, mobile-first layout and conversion-friendly sections.
- Applied clean landing-page structure, reusable sections and performance-minded frontend implementation.

Invora Dashboard / Product UI | Dashboard and application interface work

- Designed dashboard surfaces for data, navigation and product workflows using reusable cards, tabs, states and content patterns.
- Focused on clean hierarchy, scalable React components and interfaces that look finished instead of template-like.

Additional Builds | Learning and portfolio projects

- Built app concepts and systems across appointment booking, fitness/product flows and full-stack experiments using React, Firebase, Node and databases.

EXPERIENCE & WORK STYLE

Independent Developer / Design Engineer | Portfolio, freelance-ready work, client projects

- Translate rough requirements into simple product flows, strong visual sections and maintainable frontend implementation.
- Prioritize recruiter-visible proof: shipped projects, readable code structure, reusable UI, clear case studies and direct contact paths.
- Currently deepening backend capability and AWS fundamentals to support more reliable full-stack delivery.

EDUCATION & LEARNING

Computer Science / Software Development Learning Path | Ongoing

- Practical focus on frontend engineering, full-stack development, databases, APIs, accessibility, UI/UX and interview-ready fundamentals.
- Preparing AWS developer fundamentals alongside portfolio and real project work.

Available for frontend, design engineering and full-stack junior/intermediate opportunities.
